

TESTING REDUCTION/ELIMINATION CERTIFICATION

Generator: (Name of Generating Company)

Waste: (Waste Description)

Disposal Facility: Lycoming County Resource Management Services

The generator hereby certifies that the From U chemical parameters not shown as tested in this application for our above named waste are being certified in lieu of analysis, on the following bases:

INITIAL WASTESTREAM CHARACTERIZATION:

i) Generator Knowledge:

☐ The chemicals are not used in our production process. There is no reason to expect presence of these parameters in the waste. This certification is base on our knowledge of the production process and review of MSDS's for the raw materials used in the part of our process generating this waste. This certification is limited to the levels of accuracy for any instrumentation used and reporting requirements for MSDS's required of the manufacturers of our raw materials by the State and Federal governments.

ii) Known Chemical Composition:

☐ The parameters are of known chemical concentrations or are leaching N/D, based on recent chemical analyses performed on (Date)
This waste stream is of known composition and remains acceptable for disposal at the above named facility.
